

TeXstudio and MiKTeX Installation Guide (Windows)

This guide explains how to install TeXstudio and MiKTeX together on a Windows system for writing LaTeX documents. It is intended for beginners who want to set up a LaTeX environment.

1. Download Required Software

1.1 MiKTeX (LaTeX Compiler)

1. Go to the official MiKTeX website: <https://miktex.org/download>
2. Choose the installer version appropriate for your system.
3. During installation, use the following settings:
 - Install for: Anyone who uses this computer
 - Preferred paper size: A4
 - Install missing packages on-the-fly: Yes

1.2 TeXstudio (LaTeX Editor)

1. Download TeXstudio from: <https://www.texstudio.org/>
2. Run the installer and follow the default steps.

2. Compile and Test Your First Document

Paste the following LaTeX code into a new `.tex` file and compile it using the green arrow button (Build & View):

```
\documentclass{article}  
\begin{document}  
Hello, LaTeX! This is a test document.  
\end{document}
```
